Welcome to eLearning tools, the library online resources newsletter! Are you looking for some multi-disciplinary videos that you can use in your teaching? We’ve got you covered! Find videos, tips, and resources to address research skills in your spring courses!

Highlighted Videos:
- Source Analysis Video
- Summon Basics Video
- Nexis Uni Video Series

Source Analysis
Video Length: 3 minutes, 31 seconds
Course Use: Flipped content for English Composition 1001
Description: Publication, timeliness, author, and supporting evidence are elements addressed about source credibility.
Testimonial: Toni Judnith, English Composition GTA, “The video in particular was charming and helpful.”
How it was made: Lightboard technology
Sequel: Sources in Context
Creators: Becky Legerati, Kellie Tilton

Summon Basics
Video Length: 1 minute, 27 seconds
Description: Using UC Libraries Search tool, Summon
Course Use: First-year courses (e.g. ENGL 1001) with research component; second-year and upper division courses as review/refresher.
How it was made: Screencasting
Sequel: Summon: Beyond the Basics (available in Kaltura)
Creator: Kellie Tilton

Nexis Uni
Series Length: 16 minutes, 5 seconds
Description: A series of videos on Nexis Uni (formerly LexisNexis Academic) and tips on using it effectively for finding various types of sources.
Course Use: Undergraduate courses with a research component requiring use of news, business, and legal sources, including court cases. Share one video or use the whole playlist.
How it was made: Screencasting
Creator: Bob Freeman

Assignment Ideas with Video Tutorials
- Consider linking or embedding content in Blackboard.
- Use in flipped teaching to introduce students to searching and analysis.
- Combine with Blackboard Course Blog or Journal. Students watch tutorial then apply what they learned to find potential sources for research topic.
- Use as part of a research plan where students search for sources noting process and problem-solving.

Screencasting at UC
Screencasting tutorials can be created with Kaltura CaptureSpace Desktop Recorder, user-friendly software for Mac or PC, which allows faculty and students to create screen capture videos and web camera recordings. Learn more about this software and best practices for creating screencasts.
You can upload your videos to Kaltura using the Blackboard “My Media” building block.
Make sure that the online learning objects you create are accessible.
